INSTRUCTIONS FOR USE

Suitable for adult dogs older than 7 years of age, based on their weight, as specified in the daily servings on the package. The amounts are calculated based on the average requirements of an animal with a moderate level of activity. For these reasons, quantities may vary, depending on breed, physical activity and environmental conditions. Your dog will need a few days to get used to the new diet, so it is not recommended to change it abruptly. Do this progressively, mixing it with your usual food and successively increasing the proportion over a period of 5-7 days, until the previous food is completely replaced. If you're used to feeding your dog twice a day, it's perfectly normal for you to realise that it prefers to eat smaller portions more often, since it's easier to digest several smaller meals than fewer larger ones. Make sure that fresh drinking water is always available to your dog. You should also keep the package tightly closed, in a cool, dry place, isolated from sunlight and protected from possible pests.

Shelf Life: 18 months
